

WIZinspect

Delivering the highest accuracy for inline, integrated inspection solutions - on the production floor.

Finally a non-contact laser sensor with the accuracy of a touch probe and with the speed to handle high production volumes.

WIZinspect is a state-of-the-art turnkey solution for inline, non-contact parts measurement. WIZinspect incorporates WIZprobe™ - the smart laser sensor - and a sophisticated motion controller along with powerful, user-friendly software. It combines unprecedented accuracy and speed with adaptive control, automatic alignment, and customized parts inspection/reporting to meet your most demanding quality challenges.
